Job Description

Our client is a fun social payments app for cash or crypto. They are looking to attract an experienced FullStack Engineer. The role is fully remote.

Responsibilities

- Develop highly responsive and performant customer-facing and internal web applications
- Leverage test automation to build highly maintainable solutions

- Regularly demonstrate your innovative solutions to senior leadership
- Add positive energy in every meeting, and make your coworkers feel included in every interaction.
- Be able to self-learn, research, and adopt new and emerging technologies to provide solutions to specific needs.

Requirements:

- You have 3+ years of professional experience with TypeScript, Node.js and at least one of ReactJS, Angular or VueJS
- You have experience working with large scale Relational Database Systems (MySQL, Postgres, etc) and NoSQL systems (MongoDB, DynamoDB, etc)
- You have a solid understanding of object oriented (OO) analysis and design principles and demonstrate proficiency/expert knowledge in OO design.
- You have experience working with Git for version control and a good grasp of various git-flows.
- You write high quality, well-tested code to meet the needs of your customers.
- You have experience working in a fast-paced startup environment
- You have great technical and non-technical communication skills.
- You're passionate about building an open financial system that brings the world together.

Preferred Experience:

- Experience with Java and Spring Framework
- Ability to build and manage your own deployment pipeline
- Ability to design and document API using Open API specifications
- Prior experience working on a remote team

Why Join Us?

- Do something meaningful; Be a part of the future of financial technology in the continent.
- Fast moving, challenging and unique business problems
- International work environment and flat organisation
- Great career development opportunities in a growing company
- Competitive salary and equity options
- Health insurance with Gym and Spa Access
- Access to training courses for Blockchain and other relevant professional development areas
- Pan-African travel to other countries for product and market research
- Get reimbursed for books you buy and complete reading.
- Remote-Friendly with flexible working hours

Our client is an equal opportunities employer. Only qualified candidates will be contacted.
